

COMMERCIAL 4x4 OF THE YEAR

WHY THE FIGURES ARE HERE AND HOW TO USE THEM

Price: manufacturer's list price in standard form excluding VAT (in the vehicle critiques later we have also included **guideline** on-the-road prices inclusive of VAT and probable dealer's delivery and plates prices)

cc: required for taxation purposes in certain countries

Fuel: for dual-purpose vehicles not classed as 1000kg+ commercials for BIK tax surcharge

Payload kg: the maximum payload without liner or hardtop

Kerb weight kg: unladen weight in running order with all fluids and fuel

Max towing weight: this figure may have to be reduced for a fully laden vehicle to meet requirements

CPM: cost per mile – a calculation from depreciation, fuel and maintenance over the given period and mileage expressed as pence per mile

SMR: service, maintenance and repair costs in £ over the given period

Residual %: the value of the used vehicle at trade prices expressed as a percentage of its original list price with respect to the given period

3 years/36,000 miles: the average period and mileage for private vehicles such as lifestyle pick-ups

4 years/100,000 miles: the maximum usually allowed under a contract hire agreement and the average replacement cycle for commercials purchased by company fleets
